SUCCESS AND PLANS FOR THE FUTURE

21st century standards require simple and quick solutions, but also high quality of steel structures and installation services.

Following the latest achievements in the field of construction **TEHNICOM DOO** introduces the sale and installation of sandwich panels and profiles, as well as metal processing service on the latest CNC machines.

We pay special attention to quality control, aware of the fact that only by meeting high standard of quality we can guarantee the safety and quality of our products in various industrial branches.

TEHNICOM DOO has a certified quality management system according to the standard ISO 9001, ISO 14001, OHSAS 18001 which proves that the production and the final product meet the highest standard of quality.
